2450 Sycamore Ln, Apt #4B, West Lafayette, IN-47906 | 765-775-0318 | [turjo11@gmail.com](mailto:turjo11@gmail.com) | [chowdh23@purdue.edu](mailto:chowdh23@purdue.edu) | [Google Scholar](#) | Permanent Resident of the USA | [portfolio website](#)

## EDUCATION

---

**Purdue University**, West Lafayette, IN, USA

2019- 2024

**PhD** in Electrical and Computer Engineering, Research Area – Efficient Machine Learning Algorithms, **CGPA: 4.00/4.00**

Advisor - Prof. Kaushik Roy

**Bangladesh University of Engineering & Technology (BUET)**, Dhaka, Bangladesh

March 2016

**B.Sc.** in Electrical and Electronic Engineering, CGPA: 3.98/4.00, Rank: 2/205

## TEACHING EXPERIENCE

---

**Visiting Assistant Professor**, Purdue University

August 2025 – Present

- *Designed and taught* the upper undergrad level CSCI 490 **AI for IoT** course as the instructor of record.
- Developed course syllabus, lectures, assignments, and examinations aligned with program learning outcomes.
- Supervised and mentored student projects on applied AI/IoT systems, guiding literature review, implementation, and presentation.
- Assessed student learning through quizzes, assignments, and project evaluations using Brightspace and Gradescope.
- *Guest lectured* for the CSCI 487 Artificial Intelligence course, on Modern Deep Neural Network Architectures, and Neuromorphic Spiking Neural Network Models.
- Delivered a *guest lecture* in the CSCI 55200 - Data Visualization on Energy-Efficient Deep Neural Networks
- Supervising CSCI 49000 capstone project on transfer learning for biomedical applications of AI.

**Lecturer**, Bangladesh University of Engineering & Technology (BUET), Dhaka

2016-2018

- Delivered lectures, developed course materials, and conducted assessments for the following Electrical and Electronic Engineering courses:
  - Signals and Systems (EEE 301)
  - Electrical DC and AC Circuits (EEE 101, EEE 105)
  - Measurement and Instrumentation (EEE 407)
  - Digital Signal Processing (EEE 307)
  - Microprocessor and Interfacing (EEE 315)
- Responsibilities included preparing and delivering lectures, incorporating online teaching platforms for blended learning, designing and grading examinations and assignments, and providing academic guidance to students.
- Taught **12 lab courses** (including C programming, digital logic design and Microprocessor courses) and demonstrated examples in class to encourage student participation

**Adjunct Lecturer**, BRAC University, Bangladesh, Dhaka

2016

- Instructed courses in Digital Signal Processing, C++ and Matlab programming courses in large classrooms, delivering both theoretical lectures and hands-on laboratory sessions to enhance practical skills.
- Performed as an instructor of record for the VLSI course and laboratory, contributed to the curriculum and lab manual development.
- Designed, developed, and delivered Power System Protection laboratory curriculum for multiple class sections, integrating real-world scenarios and modern protection technologies.
- Supervised a group of students for [thesis project](#) on Real time heart rate estimation from severely corrupted PPG signal by motion artifact.

## TEACHING CERTIFICATION

---

**Foundations of College Teaching Certification**, Purdue University

2025

- Gained training in student-centered learning, active learning strategies, and inclusive classroom practices based on evidence-based pedagogy and instructional design.
- Applied frameworks such as **Self-Determination Theory (SDT)** and **Universal Design for Learning (UDL)** to enhance learner engagement and motivation.

- Developed skills in formative assessment, reflective teaching practice, and structured feedback for continuous improvement.
- Practiced Socratic dialogue, project-based learning, and real-world contextualization to deepen student learning.
- Strengthened ability to articulate learning objectives, align assessments, and design transparent course materials.

## SUPERVISION AND MENTORSHIP

---

**Undergraduate Capstone Supervision**, Department of Computer Science, Purdue University 2025

- Guided CSCI 49000 senior design project on transfer learning for biomedical AI.
- Emphasized reproducibility (seeded runs, versioned datasets) and explainability (saliency/Grad-CAM).
- Coordinated milestones, code reviews, and research-style writeups; supported poster/paper submissions.

**Graduate Research Mentorship**, Purdue University ECE, NRL Collaborations 2021 - 2025

- Mentored two junior graduate students on efficient ML, SNNs, and biomedical AI pipelines.
- Reviewed experiment design, code quality, and paper drafts to reach submission readiness.
- Coordinated milestones, code reviews, and research-style writeups; supported poster/paper submissions. Mentorship contributed to peer-reviewed [publications](#) and reproducible repos.

**Undergraduate Research Mentor**, Department of Electrical & Computer Engineering, Purdue University 2023

- Under Summer Undergraduate Research Fellowships (SURF) program, mentored projects on spiking neural networks for language modeling and sequence tasks.
- Guided setting up experiment tracking, ablations, and benchmarking baselines, resulting in student co-authored research presentations.

**Undergraduate Research Mentor**, Department of Electrical & Electronic Engineering, BUET and AUST 2017-2018

- Mentored an undergraduate team at BUET to implement an algorithm for real-time music beat prediction challenge, leading to honorable mention in the 4th edition of [IEEE Signal Processing Cup, 2017](#).
- Mentored a team of students of Bangladesh University of Engineering & Technology for the 1st edition of for [IEEE Video and Image Processing Cup](#) to detect traffic signs for self-driving cars, resulting in 3<sup>rd</sup> place worldwide.
- Supervised an undergraduate team at AUST for 7<sup>th</sup> edition of [IEEE Signal Processing Cup, 2020](#) to perform anomaly detection in unsupervised surveillance setting, resulting in 8<sup>th</sup> place worldwide.

**Undergraduate Thesis Supervision**, Department of EEE, BRAC University 2017

- Supervised [thesis](#) project on real-time heart-rate estimation from motion-corrupted PPG signals, guiding research design, algorithm selection, and ethical compliance.
- Mentored students in refining research questions, coding best practices, version control, and reproducible experiment pipelines, with regular progress reviews and milestone tracking.
- Provided detailed feedback on technical writing, presentation skills, and defense preparation, ensuring readiness for academic and industry audiences.

## RESEARCH AND WORK EXPERIENCES

---

**Postdoctoral Research Associate, Machine Learning, Purdue University** April 2025 - Present

- Improved rhinosinusitis surgery outcome prediction accuracy by 7% using novel ensemble ML models with human-in-the-loop.
- Mitigated the class imbalance problem of rhinosinusitis surgery outcome prediction leveraging generative AI, and enhanced the classification performance by 4%.
- Developing multimodal pipeline with CT images from medical data, resulting in ~5% surgery prediction accuracy enhancement.

**Research Scientist, Machine Learning, Meta** Sep 2024-March 2025

Develop Large Scale Machine Learning based Ads Ranking Models

- Implemented a novel architecture modeling the user behavior using event based features to enhance the ranking performance of ads ranking foundation models by 0.4%.
- Improved the predictive performance of line cook Ads models by scaling up to 5-10X, resulting in up to 1% accuracy enhancement.

**Graduate Research Assistant, Purdue University** 2019 – 2024

Scene understanding from videos

- Proposed an optimal transport formulation for unsupervised learning from videos, resulting in 22% enhancement of accuracy.
- Developed an algorithm for temporal localization of key steps in surgical videos in collaboration with IU health, with 10% accuracy improvement.

### Segmentation from Echocardiographic Images

- Implemented a UNet based segmentation algorithm from echocardiographic images on the CAMUS dataset.
- Incorporated Resnet like skip layers to enhance the segmentation performance by 3% to obtain SOTA.

### Ultra low latency Spiking Neural Networks (SNN)

- Proposed a novel temporal pruning method for low-power image recognition, reinforcement learning on Atari games and event-based optical flow estimation.
- Achieved 5X lower latency (just 1 timestep) and up to 100X higher energy-efficiency compared to prior state-of-the-art.

### Discrete Cosine Transform (DCT)-based encoding for energy-efficient SNNs

- Proposed a novel DCT-based frequency domain encoding method for SNNs to process sequential inputs.
- Achieved up to 10X lower latency and up to 2X higher energy-efficiency compared to prior state-of-the-art.

### ECG classification using Artificial Intelligence

- Proposed a novel XGboost based classification algorithm for ECG classification on the Physionet Challenge data.
- Implemented novel features and feature selection process to obtain up to 90% accuracy.

### Understanding visual syntax with Vision Transformers (ViTs)

- Reported a novel problem with ViTs where they fail to capture image syntax.
- Proposed a masked auto-encoder based training using ViTs to capture syntactic anomalies in an explainable manner.

### Understanding the effect of leak in SNNs

- Performed a frequency-domain analysis to understand the effect of the leak parameter in SNNs.
- Obtained SNNs with ~5% higher noise robustness and ~2X lower energy consumption by optimizing leak and threshold.

### Foveation-based image recognition with ViTs

- Proposed a novel attention-based bio-inspired foveation with ViTs for background agnostic image recognition.
- Achieved 2-3X lower compute and higher robustness compared to ViTs.

### Advanced ML Algorithm Intern, AI Solutions Team, Analog Devices Inc.

*September 2023- December 2023*

- Developed a GAN-based generative AI algorithm for speech enhancement using bone conduction microphone (BCM) data.
- Proposed a multimodal AI approach fusing air conduction and BCM signals, with 20 dB enhancement over SOTA.
- Evaluated the proposed method on an in-house dataset and developed a demo for the pipeline.

### Research Associate, Digital Signal Processing Research Laboratory, BUET

*Jan 2015 – April 2018*

- Developed a novel adaptive filtering based heart rate measurement algorithm from photoplethysmography (PPG) for real-time outdoor applications in severe motion artifact cases which achieved state-of-the-art accuracy (<1% error in BPM heart rate estimation).
- Implemented a novel pole-matching using unsupervised machine learning for region-of-recording identification from multimedia signals.

## GRAD COURSEWORK

---

Machine Learning I and II, Deep Learning, Reinforcement Learning, Optimization, Probability and Random Signals, Digital Image Processing, Digital Video Processing, Linear Algebra, Algorithms and Data Structures, CMOS VLSI design, IC/MEMS Fabrication

## AWARDS AND GRANTS

---

- Travel for Collaborative Research ([TRACER](#)) Grant, 2024, awarded from **Purdue** in collaboration with **Georgia Tech**. Grant amount \$10000.
- Travel grant for European Conference on Computer Vision (ECCV), 2022, awarded from **Meta**. Grant amount \$1500.
- *1<sup>st</sup> prize* at Research idea contest, School of ECE, Purdue University, 2022.
- *8<sup>th</sup> prize in IEEE Signal Processing Cup 2020*, Barcelona, Spain for proposing an unsupervised method to detect abnormalities in the behavior of the ground and aerial systems based on embedded sensor data in real-time.
- Dean's Fellowship, University of Maryland, College Park, USA, 2019.
- Department of EECS Fellowship, University of California, Berkeley, 2017.

- Best Paper Award in IEEE Region 10 Humanitarian Technology Conference (R10-HTC), 2017 for implementation of wheelchair with advanced control features.
- 3<sup>rd</sup> prize in *IEEE Video and Image Processing Cup, 2017*, Beijing, China (1500\$ prize money with 1200\$ travel grant), for implementing a computer vision algorithm to identify traffic signs in severe conditions from both real and artificial videos.
- 1<sup>st</sup> prize in *IEEE Signal Processing Cup 2016*, Shanghai, China (5000\$ prize money with 1200\$ travel grant), for proposing a machine learning based algorithm which performs location forensics from media recordings.
- Best Paper Award in the International Conference on Electrical and Computer Engineering (ICECE), 2016.
- 2<sup>nd</sup> prize in *IEEE Signal Processing Cup 2015*, Brisbane, Australia (2500\$ prize money with 1700\$ travel grant), for development of real-time heart beat tracking system from wrist-watch signals focusing on mobile applications.
- Dean's List Award and University Merit Scholarship (at all terms of undergraduate study).

## SKILLS AND AFFILIATIONS

---

Computer : Linux, Machine learning (Pytorch, Tensorflow, Keras), MATLAB, Python, C, C++, Java, Verilog, Assembly, HTML, PHP, MS Office, Adobe Illustrator, Photoshop, AutoCad, Cadence, Zeemax, Solidworks

Language : Bengali, English, Hindi and Urdu (Fluent), Arabic (Reading and writing)

Affiliations: Student member- Institute of Electrical and Electronics Engineers, Committee Member - Purdue Bangladesh Student Association, Purdue Graduate Student Government, Member- HKN beta chapter, Purdue, Purdue ECE Graduate Student Association and Purdue Chess Club

## PROFESSIONAL ACTIVITIES

---

- Reviewer:
  - Journals: Neurocomputing, Neural Networks, IEEE Access, IEEE Journal of Biomedical and Health Informatics, Frontiers in Neuroscience, IEEE Open Journal of Signal Processing, Decision Making and Analysis, Frontiers in Applied Mathematics and Statistics, IEEE Transactions on Cognitive and Developmental Systems, Frontiers in Computational Neuroscience
  - Conferences: ICLR, NeurIPS, AISTATS, WACV, AAAI, Workshop and Challenge on Unlearning and Model Editing, IEEE International Symposium on Circuits and Systems (ISCAS)

## PRESENTATIONS

---

- Presented at premier Machine Learning conferences including NeurIPS 2024, ECCV, 2022, ICCV, 2021 and IJCNN, 2021.
- Presented at IEEE International Conference on Machine Learning and Applications (ICMLA), in 2020.
- Presented at International Conference on Acoustics, Speech, and Signal Processing, ICASSP, (the annual flagship conference of IEEE Signal Processing Society), in Australia, 2015 and China, 2016.
- Communicated our research at various international conference avenues such as IEEE Region-10 Humanitarian Technology Conference, International Conference on Electrical and Computer Engineering, IEEE Region 10 Conference, TENCON.
